We have no doubt that when the people give the matter careful and thoughtful consideration they will come to the conclusion that the best roads are the cheapest.

### VOTE ON TREATY.

Next Monday, the 6th inst., has been fixed upon for taking the vote in the United States Senate upon the ratification of the treaty with Spain. It is remarkable that so many Senators will, in the face of the expressed wishes of a vast majority of the States and people, continue their efforts to defeat the treaty.

This opposition to the ratification of the treaty is, however, the manifestation of the same spirit that has been controlling the representatives of the Democratic party in Congress for more than a quarter of a century. That party has won the distinction of being the party of obstruction and destruction, and its present Senatorial representatives seem determined to have the title retained.

There has been no rational cause for delay in the ratification of the treaty. The only reason its opponents have been able to assign was the fear of what they called "imperialism." The treaty in no way settles the future policy of our Government in connection with the Philippines; and, therefore, the supposed danger which is petit pois. At that time it was deemed being urged by those hostile to the treaty impossible to produce the required quality is merely a creation of the Democratic in this country, consumers desiring firm Senators, originated to obstruct the Admin- even bright green goods, and although istration.
